 BILLING CODE 6450-01-P

Notice of Floodplain Involvement for Casey's Pond Improvement Project at Fermi National Accelerator Laboratory, Batavia, IL

AGENCY: U.S. Department of Energy (DOE).

ACTION: Notice of floodplain involvement.

SUMMARY: DOE proposes to construct a six acre cooling pond in a floodplain located in DuPage County, Illinois. Approximately 15% of the new pond would be within the 100-year floodplain of Kress Creek on the Fermi National Accelerator Laboratory (Fermilab) site. In accordance with DOE Regulations for Compliance with Floodplains/Wetlands Environmental Review Requirements (10 CFR Part 1022), DOE will prepare a floodplain assessment and will perform this proposed action in a manner so as to avoid or minimize potential harm to or within the affected floodplain.

DATES: Comments are due to the address below no later than May 15, 1995.

ADDRESSES: Comments should be addressed to Andrew E. Mravca, Area Manager, Batavia Area Office, U.S. Department of Energy, P.O. Box 2000, Batavia, Illinois 60510.

FOR FURTHER INFORMATION ON THIS PROPOSED ACTION, CONTACT: Andrew E. Mravca, Area Manager, Batavia Area Office, U.S. Department of Energy, P.O. Box 2000, Batavia, Illinois 60510, Phone: (708) 840-3281, FAX: (708) 840-3285.

FOR FURTHER INFORMATION ON GENERAL DOE FLOODPLAIN ENVIRONMENTAL REVIEW REQUIREMENTS, CONTACT: Dr. W. Sedgefield White, Chicago Operations Office, U.S. Department of Energy, 9800 South Cass Avenue, Argonne, Illinois 60439, Phone: (708) 252-2101, FAX: (708) 252-2835.

SUPPLEMENTARY INFORMATION: The proposed action would consist of two parts. The first would be to add a six acre pond to an existing system of surface waters including ponds and ditches to provide needed additional cooling capacity. The second would be to install a transfer pipe and pumphouse to connect Casey's Pond to the existing surface water storage system to provide more efficient use of surface water storage capacity. The cooling water from the existing system is used primarily to cool heat exchangers located within the fixed target experimental complex at Fermilab. The additional cooling capacity and effective use of storage capacity is needed to avoid inefficiency and potential system shutdowns due to overheating. The added cooling would also help to avert unacceptable thermal discharges to Kress Creek. The new pond also would provide increased storage capacity for fire protection systems. Consultation with the Illinois Environmental Protection Agency and the Illinois Department of Transportation has been initiated to obtain the required permits.

In accordance with DOE regulations for compliance with floodplain and wetlands environmental review requirements (10 CFR Part 1022), DOE will prepare a floodplain assessment for this proposed DOE action.

The assessment will be included in the Environmental Assessment (EA) prepared for the proposed project in accordance with the requirements of the National Environmental Policy Act. Should the evaluation of environmental impacts in the EA support a finding of no significant impact (FONSI), the floodplain statement of finding shall be included. In the event an environmental impact statement (EIS) is needed, the floodplain statement will be contained in the record of decision (ROD).

Issued in Argonne, Illinois, this 12th day of April 1995.

Cherri J. Langenfeld,
Manager, Chicago Operations Office.

BILLING CODE 6450-01-P

Chicago Operations Office, Federal Assistance Solicitation for Cooperative Agreement Proposals

AGENCY: U.S. Department of Energy.

ACTION: Notice of availability of a Federal assistance solicitation for cooperative agreement proposals.

SUMMARY: The U.S. Department of Energy (DOE) pursuant to the DOE Financial Assistance Rule 10 CFR 600.9, announces the availability of a solicitation, FASCAP No. DE-SC02-95CE41122, for the Industrial Heating Equipment Research Program. This notice supersedes Federal Register Publication dated February 7, 1995, (60 FR 7178).

FOR FURTHER INFORMATION CONTACT: Cynthia Anderson, U.S. Department of Energy, Chicago Operations Office, 9800 South Cass Avenue, Argonne, IL 60439, (708) 252-2844.

SUPPLEMENTARY INFORMATION: The U.S. Department of Energy (DOE) plans to issue a Federal Assistance Solicitation for Cooperative Agreement Proposals (FASCAP), April 21, 1995 for the Industrial Heating Equipment Research Program. The program has the following objectives: (1) To improve industrial energy use efficiency and productivity in heating and combustion for process heat by at least 20%; (2) to improve and increase the use of waste-source fuels; (3) to reduce the national environmental impacts of industrial wastes that results from less efficient production and delivery of process heat; and (4) to lower the industrial production costs and improve the competitive position of U.S. industry relative to foreign-based industry.

The areas of interest of the Solicitation are centered on four main targeted areas that economically conserve energy while minimizing or reducing waste materials. They are (1) optimization of heat transfer to furnace loads, (2) development of adjustable co-fired combustors/combustion chambers for converting industrial waste to process heat or electric power, (3) development of low-cost combustion controls for improving efficiency of multi-burner boilers and industrial furnaces, and (4) high temperature (Order of 2000 degrees F) particulate removal system for application to solid-fueled gas turbines. The Solicitation will apply to any or all of the DOE Industries of the Future, which are high consumers of heating fuel. These industries presently include petroleum, chemicals, pulp/paper, aluminum, glass and steel. Initial funding will favor proposals that apply to the glass industry, and to more than one of the

Industries of the Future. Broader coverage, which includes glass, is most desirable. Applicants must demonstrate that the proposed technology can economically accomplish more energy efficient and environmentally acceptable production, that the proposed technology if implemented, can result in 20 percent energy efficiency, and that DOE funding is necessary for development and ultimate commercialization of the proposed technology.

Each project will consist of up to three phases: Phase I, R&D Definition; Phase II, Development; and Phase II, Demonstration Testing and Commercialization Planning. If any of the Phase I work has already been performed, the applicant may propose a project for only the uncompleted Phase I work and the remaining Phases; however, the proposal must fully document and demonstrate that the previous work has been successfully completed. The estimated DOE funding for Phase I is \$725,000 (to be spent in GFYs 1995 and 1996). A minimum of 20 percent cost sharing (non-federal) is required for Phase I. Cost sharing for Phase II and Phase III will be in accordance with the Energy Policy Act (EPACT), P.L. 102-486, 42 U.S.C. 13525. The resultant agreement will be managed by the DOE, Chicago Operations Office. The period of performance may vary, depending on the project, from one to six years. Proposals will be due by June 1, 1995. If you are interested in receiving the FASCAP, contact Cynthia Anderson at the above address or (708) 252-2844. All responsible sources may submit a proposal which will be considered.

The Solicitation is subject to the Energy Policy Act, P.L. 102-486, 42 U.S.C. 13525. Section 2306 imposes eligibility requirements on companies seeking financial assistance under Titles XX through XXIII of the Act. A company shall be eligible to receive financial assistance under Titles XX through XXIII of the Act only if the Secretary finds that the company's participation in any program under such titles would be in the economic interest of the United States, as evidenced by investments in the United States in research, development, and manufacturing (including, for example, the manufacture of major components or subassemblies in the United States); significant contributions of employment in the United States; an agreement with respect to any technology arising from assistance provided under this section to promote the manufacture within the United States of products resulting from that technology (taking into account the

goals of promoting the competitiveness of United States industry), and to procure parts and materials from competitive suppliers.

Issued in Chicago, Illinois on April 12, 1995.

Timothy S. Crawford,
Assistant Manager for Human Resources and Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Information Collection Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, Department of Energy.

ACTION: Notice of request submitted for review by the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act. The listing does not include collections of information contained in new or revised regulations which are to be submitted under section 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, extension, or reinstatement; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses per respondent annually; (11) An estimate of the average hours per response; (12) The estimated total annual respondent burden; and (13) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed on or before May 30, 1995. If you anticipate that you will be submitting comments but find it difficult to do so within the time allowed by this notice, you should advise the OMB DOE Desk Officer listed below of your intention to do so as soon as possible. The Desk Officer may be

telephoned at (202) 395-3084. (Also, please notify the EIA contact listed below.)

ADDRESSES: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place N.W., Washington, D.C. 20503. (Comments should also be addressed to the Office of Statistical Standards at the address below.)

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the forms and instructions should be directed to Jay Casselberry, Office of Statistical Standards, (EI-73), Forrestal Building, U.S. Department of Energy, Washington, D.C. 20585. Mr. Casselberry may be telephoned at (202) 254-5348.

SUPPLEMENTARY INFORMATION: The energy information collection submitted to OMB for review was:

1. Energy Information Administration
2. EIA-871A/F
3. 1905-0145
4. Commercial Buildings Energy Consumption Survey (CBECS)
5. Revision
6. Triennially
7. Voluntary
8. Business or other for-profit; State, Local, or Tribal Government
9. 7448 respondents
10. .333 responses annually
11. 1.275 hours per response
12. 3,167 hours respondent burden
13. EIA-871A/F collects data on energy consumption by commercial buildings and the characteristics of these buildings. The surveys fulfill planning, analyses and decision-making needs of DOE, other Federal agencies, State governments, and the private sector. Respondents are owners/managers of selected commercial buildings and their energy suppliers.

Statutory Authority: Sec. 2(a) of the Paperwork Reduction Act of 1980, (Pub. L. No. 96-511), which amended Chapter 35 of Title 44 United States Code (See 44 U.S.C. § 3506(a) and (c)(1)).

Issued in Washington DC, April 24, 1995.

Yvonne M. Bishop,

*Director, Office of Statistical Standards,
Energy Information Administration.*
